

# Set Up the Interface Cricket

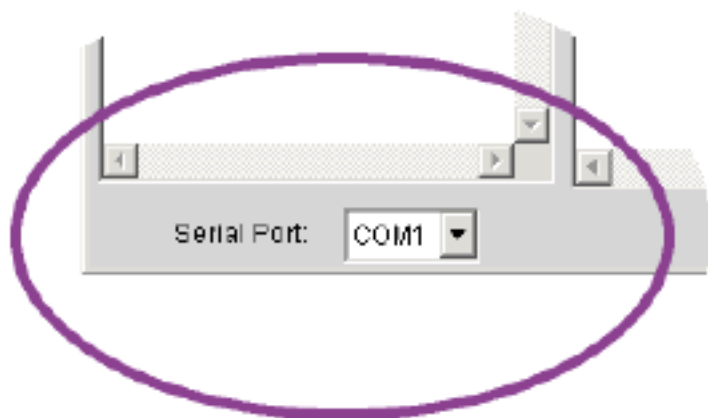

The Interface Cricket plugs into your PC's serial port and lets the PC communicate with the Handy Cricket.

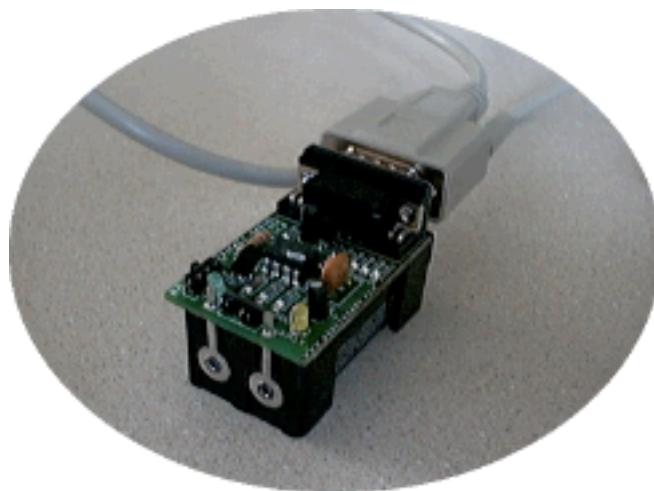

1. Here's the Interface Cricket. Put in an alkaline 9v battery.

2. Using the cable, plug it into a serial port on the back of your PC.

3. Make sure to select the right serial port in the Cricket Logo software.

4. Turn it on, and the Interface Cricket is ready to go!
